## CALLUM JACKSON

I have been constructing fences for over 15 years, previously as a labourer and now as business owner. With a Bachelor of Science Degree in Agriculture I understand both the theoretical and practical elements of land management, with a focus on fencing.

My business, CJ Fencing, led by myself employs a team of experienced fencing specialists with the skills, machinery and knowledge to construct long life fences quickly and efficiently. All CJ Fencing staff are CSCS and/or CPCS qualified.

We construct a wide range of fencing to suit client's requirements within the timescales and budget. All of this we execute to the highest standards even if we have to work in all weathers.

In addition to fencing we offer shepherding services for smallholders and farmers, whether its contract sheep shearing or general management of a flock we have the mobile handling systems and skills to help.

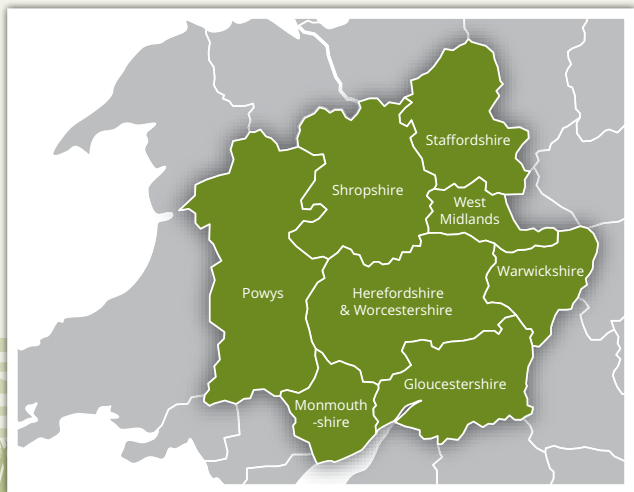

**Call 01905 797390 or 07515 450774**

**CJ Fencing is an independent business based in Worcestershire providing fencing solutions to a wide range of clients across the Midlands.**

- Farmers
- Estates
- Landowners
- Local Businesses
- Country Parks
- Civil Engineers
- District & County Councils
- Housing Developments

We offer a wide range of fencing solutions from standard stock fencing through to bespoke requirements. We offer a free site visit where we can discuss requirements in more detail, providing recommendations and quotation. If site clearance is required we can undertake this prior to any fencing work.

# FENCING

We own and operate three self-propelled tracked post drivers to install a wide range of fencing;

- Post and rail
- Equine fencing
- Deer fencing
- Permanent electric fencing
- 400 metres of fully installed stock fencing per day using tensioned high tensile wire

All timber used has a 15 year warranty, available in different forms and competitively priced for economic long life class 4 fences.

## TREE SHEAR & SITE CLEARANCE

We own and operate a 2.5 – 4.5 tonne excavator mounted tree shear that cuts up to 9 inch diameter for;

- Hedge height reduction
- Woodland thinning
- Coppicing
- Willow pollarding

In a day the team can coppice up to 200m of hedge all executed in a safe and efficient manner, removing post and wire as required. CJ Fencing has recently purchased an excavator mounted flail head for mulching brambles, thorns and shrub bushes to quickly clear areas of scrub land for access or fence line installation.

Digger hire with an experienced operator is available for site clearance projects.
